Notes:

1. The chart is to be used to recover vehicle running costs related to the use of personal vehicles on Church business only.
2. Calculation is based on a combined average AA running cost rate for petrol and diesel cars.
3. The average rate works out to be 28.0p per mile based on current AA rates *(AA Motoring Costs 2013).*
4. The average rate above is to be used for travel to destinations not covered in the chart. A mileage log is to be supplied with the claim in such circumstances.
